## Set Theory Relationship Mapping (STRM)

## Reference Document : Secure Controls Framework (SCF) version 2024.3

## Focal Document: IEC TR 60601-4-5

Focal Document URL: https://webstore.iec.ch/publication/64703

STRM URL: https://securecontrolsframework.com/content/strm/scf-2024-3-iec-tr-60601-4-5.pdf

Set Theory Relationship Mapping (STRM) is well-suited for mapping between sets of elements that exist in two distinct concepts that are mostly the same as each other (e.g., cybersecurity & data privacy requirements). STRM also allows the strength of the mapping to be captured.

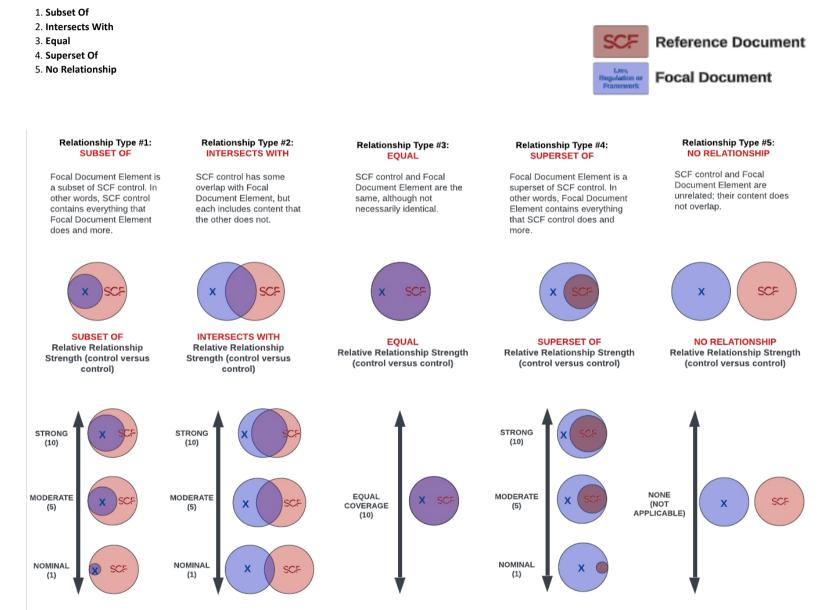

STRM relies on a justification for the relationship claim. There are three (3) options for the rationale, which is a high-level context within which the two concepts are related:

1. Syntactic: How similar is the wording that expresses the two concepts? This is a word-for-word analysis of the relationship, not an interpretation of the language.

2. Semantic: How similar are the meanings of the two concepts? This involves some interpretation of each concept's language.

3. Functional: How similar are the results of executing the two concepts? This involves understanding what will happen if the two concepts are implemented, performed, or otherwise executed.

Based on NIST IR 8477, STRM supports five (5) five relationship types to describe the logical similarity between two distinct concepts:

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes (optional)
1.0	Scope	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	no relationship	N/A	N/A	N/A	(optional) N/A	No requirements to map to.
2.0	Normative references	Buy a copy of IEC TR 60601-4-5:2021 for control content:	Functional	no relationship	N/A	N/A	N/A	N/A	No requirements to map to.
3.0	Terms and definitions	https://webstore.iec.ch/publication/64703 Buy a copy of IEC TR 60601-4-5:2021 for control content:	Functional	intersects with	Standardized Terminology	SEA-02.1	Mechanisms exist to standardize technology and process terminology to reduce	5	
4.0	Common Security Constraints	https://webstore.iec.ch/publication/64703 Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	no relationship	N/A	N/A	confusion amongst groups and departments. N/A	N/A	No requirements to map to.
4.1	Overview	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Asset Scope Classification	AST-04.1	Mechanisms exist to determine cybersecurity & data privacy control applicability by identifying, assigning and documenting the appropriate asset scope categorization for all systems, applications, services and personnel (internal and third-parties).	5	
			Functional	intersects with	Select Controls		Mechanisms exist to compel data and/or process owners to select required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
			Functional	intersects with	Operationalizing Cybersecurity & Data Protection Practices		Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
			Functional	intersects with	Risk Management Program	KSK-UI	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls. Mechanisms exist to document and validate the scope of cybersecurity & data privacy	5	
			Functional	intersects with	Compliance Scope		controls that are determined to meet statutory, regulatory and/or contractual compliance obligations. Mechanisms exist to compel data and/or process owners to implement required	5	
			Functional Functional	intersects with	Implement Controls Endpoint Security	GOV-15.2 END-01	cybersecurity & data privacy controls for each system, application and/or service under their control. Mechanisms exist to facilitate the implementation of endpoint security controls.	5	
	Support of Essential Function	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703			Configuration		Mechanisms exist to facilitate the implementation of configuration management		
			Functional	intersects with	Management Program System Hardening Through Baseline	CFG-01	controls. Mechanisms exist to develop, document and maintain secure baseline configurations for technology platforms that are consistent with industry-accepted system hardening	5	
4.2			Functional	intersects with	Configurations Identity & Access Management (IAM)	IAC-01	standards. Mechanisms exist to facilitate the implementation of identification and access management controls.	5	
			Functional	intersects with	Product Management		Mechanisms exist to design and implement product management processes to update products, including systems, software and services, to improve functionality and correct security deficiencies.	5	
			Functional	intersects with	Minimum Viable Product (MVP) Security Requirements	TDA-02	Mechanisms exist to ensure risk-based technical and functional specifications are established to define a Minimum Viable Product (MVP).	5	
4.3	Compensating Countermeasures	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	equal	Compensating	RSK-06.2	Mechanisms exist to identify and implement compensating countermeasures to reduce risk and exposure to threats.	10	
4.4	Least Privilege	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Least Privilege		Mechanisms exist to utilize the concept of least privilege, allowing only authorized access to processes necessary to accomplish assigned tasks in accordance with	5	
		Buy a copy of IEC TR 60601-4-5:2021 for control content:	Functional	intersects with	Minimize Sensitive & Regulated Data		organizational business functions. Mechanisms exist to minimize sensitive/regulated data from being processed in the information lifecycle to elements identified in the Data Protection Impact Assessment	5	
4.5	Data Minimization	https://webstore.iec.ch/publication/64703	Functional	intersects with	Collection Minimization	END-13.3	(DPIA). Mechanisms exist to utilize sensors that are configured to minimize the collection of information about individuals.	5	
4.6	Overarching Constraints	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	no relationship	N/A	N/A	N/A	N/A	No requirements to map to.
	Constraints Referenced by the Medical Device Specifications	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Select Controls		Mechanisms exist to compel data and/or process owners to select required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
4.6.1			Functional	intersects with	Operationalizing Cybersecurity & Data Protection Practices		Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
			Functional	intersects with	Implement Controls		Mechanisms exist to compel data and/or process owners to implement required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
4.6.2	Hardware Security	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Minimum Viable Product (MVP) Security Requirements		Mechanisms exist to ensure risk-based technical and functional specifications are established to define a Minimum Viable Product (MVP).	5	
			Functional	intersects with	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's systems and data.	5	
			Functional	intersects with	Product Management		Mechanisms exist to design and implement product management processes to update products, including systems, software and services, to improve functionality and correct security deficiencies.	5	
			Functional	intersects with	Threat Analysis	THR-10	Mechanisms exist to identify, assess, prioritize and document the potential impact(s) and likelihood(s) of applicable internal and external threats.	5	
462	Specific Security Features for Medical Devices	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Product Management		Mechanisms exist to design and implement product management processes to update products, including systems, software and services, to improve functionality and correct security deficiencies.	5	
4.6.3			Functional	intersects with	Minimum Viable Product (MVP) Security Requirements		Mechanisms exist to ensure risk-based technical and functional specifications are established to define a Minimum Viable Product (MVP).	5	
5.0	Security Levels for the Different Foundational Requirements	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	no relationship	N/A	N/A	N/A	N/A	No requirements to map to.
	Application of Security Levels	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Configuration Management Program	CFG-01	Mechanisms exist to facilitate the implementation of configuration management controls.	5	
			Functional	intersects with	Implement Controls		Mechanisms exist to compel data and/or process owners to implement required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
5.1			Functional	intersects with	System Hardening Through Baseline Configurations		Mechanisms exist to develop, document and maintain secure baseline configurations for technology platforms that are consistent with industry-accepted system hardening standards.	5	
			Functional	intersects with	Operationalizing Cybersecurity & Data Protection Practices		Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
5.2	Modified Specifications for Security Levels	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	Compensating Countermeasures Approved Baseline	AST-02.4	Mechanisms exist to identify and implement compensating countermeasures to reduce risk and exposure to threats. Mechanisms exist to document and govern instances of approved deviations from	5	
2 - CR 1.2 RE(1)	Unique Identification and Authentication	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional Functional	intersects with	Deviations Device Authorization Enforcement	$\Delta S = 0 / 4$	established baseline configurations. Mechanisms exist to enforce unique device cryptographic communications keys to prevent one key from being used to access multiple devices.	5	
5.2 - CR 2.1	Authorization	Buy a copy of IEC TR 60601-4-5:2021 for control content:	Functional	intersects with	System Privileges Isolation	SEA-04.4	Mechanisms exist to isolate, or logically separate, any application, service and/or process running with system privileges.	5	
J.2 - UN 2.1	Enforcement	https://webstore.iec.ch/publication/64703	Functional	intersects with	Process Isolation	SEA-04	Mechanisms exist to implement a separate execution domain for each executing process.	5	
5.2 - CR 4.1	Health Data De- Identification	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	intersects with	De-Identification (Anonymization)	DCH-23	Mechanisms exist to anonymize data by removing Personal Data (PD) from datasets.	5	
5.2 - CR 5.1	Network Segmentation (macrosegementation)	Buy a copy of IEC TR 60601-4-5:2021 for control content: https://webstore.iec.ch/publication/64703	Functional	equal	Network Segmentation (macrosegementation)		Mechanisms exist to ensure network architecture utilizes network segmentation to isolate systems, applications and services that protections from other network	10	
6.0	Technical Description	Buy a copy of IEC TR 60601-4-5:2021 for control content:	Functional	no relationship	N/A	N/A	resources. N/A	N/A	No requirements to map to.
